**National Drive Electric Week in Canada
Come meet EV drivers and learn more about EVs**

Montreal, September 8, 2015 - Electric Mobility Canada (EMC) invites the general public, the media and government representatives to take part in the many events organized during the National Drive Electric Week (NDEW). NDEW 2015 will be held from Sept. 12 to 20, 2015 in cities across North America. It is a celebration of the benefits of all-electric and plug-in hybrid-electric cars.

EMC is proud to promote a dozen of Canadian events of this special week to highlight even more the importance of EVs, their availability and their quiet drive, with no and low-emission vehicles.

Planned from coast-to-coast by electric vehicle (EV) drivers' associations, energy providers and other stakeholders, NDEW 2015 will see EV showcases and test drives and bring out numerous EV enthusiasts who will share their passion for electric vehicles. Events will be held in Sechelt (BC), Calgary and Edmonton (AB), Saskatoon and Regina (SK), Winnipeg (MA), Niagara region, Aurora and Bolton (ON), Shawinigan, Lévis, Victoriaville and Magog (QC), and Fredericton (NB).

"Electric cars are fun to drive, are convenient to charge at home, and better for the environment. They promote local jobs, are economical and help reduce our dependence on foreign oil. Come be part of the celebration!" indicates EMC President and CEO, Chantal Guimont.

To see a complete list of the events, go to the [EMC website](#) and follow the hashtag #NDEW2015 on Twitter.

About Electric Mobility Canada

Founded in 2005, Electric Mobility Canada (EMC) is a national not-for-profit organization dedicated to the promotion of electric mobility. EMC counts close to 140 members across the country from different industry sectors, including infrastructure, technology and energy providers, electric vehicle manufacturers, fleet managers, municipalities, universities, public transit bodies as well as EV owner associations.
